

# Part-Time Foundations Course

## About Momentum

Momentum provides relevant skills-based training in technology that meets the immediate demands of local employers. We are a community of continuous learners who support career growth in technology for the Triangle area. We bring students and employers together to address the talent gap in technology.

## Course Description

The course guides students through the fundamentals of web development using HTML, CSS, Javascript, and the command line. This is a great class for students wanting to understand coding fundamentals for tech jobs in design and project management. It's also a recommended course for students interested in pursuing our full-time Coding Immersive course. **Computer Requirements:** Bring your own laptop (any kind).

### FORMAT:

Part-Time, Evenings for 2 Weeks (14 Hours Total)

### TIME:

7 days split between 2 weeks, 6–8pm

### PRICE:

\$750

### OUTCOME:

Students will gain a basic understanding of the web and consider yourself a web power user. You will be able to build their own static webpage and you will be comfortable interacting with your computer in a text-based environment.

## Registration

Registration for the course is on a first come first serve basis as space allows in each class. The only prerequisite for the class is that you have completed high school or the equivalent. Classes run on a bi-monthly basis based on location, and the form to complete can be found [here](#).
